

Technoship provides a wide range of inspection & certification services on the Life saving equipment for all kind of vessels.

Our quality services are approved by leading safety manufactures and from the major IACS classification societies.

Technoship has nurtured a committed and motivated employee group with improving skills that handle all customer needs under high quality standard and responsibility. Our Technical team always holds at least two valid certificates for any operation that we carry out.

Additionally, our technical library is always updated with new manufactures manual editions, Service Bulletins, Technical newsletters.
