Internal Lifeboat Light
SL-500

Introduction

Daniamant is proud to present a new internal lifeboat light to accompany the existing SL-400 external lifeboat light. The addition of the SL-500 internal lifeboat light will assist in Customers moving towards a higher quality, longer lasting and more robust technology than the older existing product ranges.

Features

- 10-30v DC external power
- Flange mount with cable entry hole
- >0.5 Candela light intensity (average 5.3 cd)
- SOLAS approved
- Sealed, small and compact
- Robust
- Steady light

The SL-500 is a high quality internal Lifeboat Light designed to build on the very successful SL-400 introduced last year.

It is designed to be fitted on motorised survival craft and to be connected to the craft's 12v electrical system.

The SL-500 Lifeboat Light uses the latest advances in LED technology. It features very low current consumption and enhanced reliability.

The product comes with a standard 4 metres length of cable which can be cut down to suit the craft's requirement.

With the SL-400 and SL-500 you have a full solution for any survival craft.

Installation

Use stainless steel screws, mounting must be on a flat surface. Connect the cable to the external power-supply (10-30v DC), observing the correct polarity.

Dimension details can be found on our Technical Data Sheet for more information.

Polar Code

The SL-500 has been tested against the Polar Code to -52 C for use in polar regions. Please see the product page on our website for a Statement of Test.

Daniamant design and manufacture all of our products in line with the relevant worldwide approvals, technical specifications, current legislation and International directives.
